

Plant City Junior Forensic Science Program

Program Highlights:

- **Crime scene simulation:** Work to solve challenging murder cases.
- **Forensic Workshops:** Learn cutting-edge techniques including fingerprint and DNA analysis.
- **Guest speakers:** Meet leading forensic scientists from the FBI, US Military, FDLE, and other law enforcement organizations.
- **Meet Forensic Professionals**
- While at the Improvement League Forensic Program, you will meet with and learn from leaders in the fields of forensic science and law enforcement. In past years, students have heard from special guest speakers including top analysts from agencies such as the FDLE, Federal Bureau of Investigation and the Drug Enforcement Agency.

You will learn the skills of crime scene investigation including:

- DNA Analysis
- Blood Spatter Analysis
- Skeletal Identification
- Fingerprinting
- Footwear and Tire Impressions

Explore in-depth the entire judicial process, from the discovery of a crime, through collecting and analyzing all of the critical evidence, to preparing for the courtroom process and taking part in the criminal trial. Examine a court case in the Supreme Court, in which you will step forward in front of your peers to assume the role of a forensic expert, use analytical skills to review and present evidence on your findings.

Students this year attended the following conferences/crime labs

World Academy of Forensic Science Conference, Orlando
Florida International Association of Identification
Florida Department of Law Enforcement Tampa Crime Lab
